

BENEFIT Payment Gateway

Magento v2.4.1 Plugin

About

This document introduces BENEFIT Payment Gateway for Magento 2.4.1. Subsequent sections of the document explain step by step, how to integrate the plugin to Magento and use it.

Target Audience

This document is useful for Merchants, who are going to use BENEFIT Payment Gateway Magento 2.4.1 for the first time or re-installing the plugin in Magento.

Merchant Integration Process

➤ Installation Steps (Via FTP)

1. Extract the zip file and upload “BENEFIT” folder to Magento <root>/app/code.
2. Run the Magento commands as required by your Magento setup (commands related to permissions, etc. may also be required. Please refer Magento documentation for more details) –

php bin/magento setup:di:compile

php bin/magento setup:upgrade

php bin/magento setup:static-content:deploy –f

3. Follow the configuration section to configure the module in Magento Admin panel.

Configuring the Payment Method

1. Login and Navigate to Store->Configuration->Sales->Payment Methods. Expand the tab named 'BENEFIT iPay'.

The screenshot shows the 'Configuration' page for the 'BENEFIT iPay' payment method. The left sidebar contains navigation links: DASHBOARD, SALES, CATALOG, CUSTOMERS, MARKET HD, CONTENT, REPORTS, STORES, SYSTEM, and FIND PARTNERS & DISTRIBUTORS. The main content area has a 'Configuration' header with a 'Save Config' button. Below the header, there's a 'BENEFIT iPay' tab selected. The configuration fields are as follows:

Field	Value
Enabled	Yes
Title	FSSNet iPay
Encryption	TDES
Gateway URL	https://securepgtest.fssnet.co.in/payc/PaymentHTTP.htm?param=paymentInit
Portal ID	wool234
Portal Password	wool@1234
Resource Key	911302078239911302078242
UDF1	a
UDF2	b
UDF3	c
UDF4	d

Below the configuration fields, there are two radio buttons: 'Purchase Order' (selected) and 'Authorize.net Direct Post'.

You should see the page as shown in above pic. If not, clear Cache, then repeat this step.

2. Fill up the configuration details as you received. Find below brief description of the fields:

a) **Enabled:** 'Yes' to enable the module.

b) **Title:** BENEFIT Payment Gateway

c) **Encryption:** AES-IV

d) **Gateway URL:**

Test: https://test.benefit-gateway.bh/payment/PaymentHTTP.htm?param=paymentInit

Production: https://www.benefit-gateway.bh/payment/PaymentHTTP.htm?param=paymentInit

e) **Tran Portal ID:** *use the value provided over email.*

f) **Tran Portal Password:** *use the value provided over email.*

g) **Resource Key:** *use the value provided over email.*

h) **UDF1 to UDF4:** optional fields

3. After you have setup information in step 2, click on Save Config and you can have your customers make payment via the payment method.
